Hanks Near-Point Eye Charts

The *Hanks Near-Point Eye Charts** were designed by an optometrist, Anthony Hanks OD. They are produced in two versions: "1: *General Purpose / Adults*" and "2: *Children*". For convenience, the two versions are now supplied on reverse sides of the same card.

QUALITY

The *Near-Point Eye Charts* were produced for the designer's own practice. They are A4 sized and laminated for durability.

REALISTIC

Each *Near-Point Eye Chart* contains a realistic representation of common tasks.

ADULT VERSION:

- ◆ A calibrated range of type sizes..
