

Installing Eye Tools

Document: 00126 Last edited: 8/7/08

The *eye tools* program is no longer supplied on a CD-Rom. Instead, the program is conveniently available for internet download.

1. Download

To **download** the *eye tools* program...

- ◆ Go to www.hanks.optom.com.au
- ◆ Select *Eye Tools Support*, then *Software Download* and *Download Now*.
- ◆ Select *Save* and navigate to a logical location on your hard drive for the file to be stored. *OK*.

2. Install

To **install** the *eye tools* program...

- ◆ On the Windows Desktop go to *Start* (lower left corner), then *Run*.
- ◆ *Browse* the hard drive to the location where the file was saved above.
- ◆ Select the file *setup.exe* and then *Open*.
- ◆ Follow the prompts to complete installation.

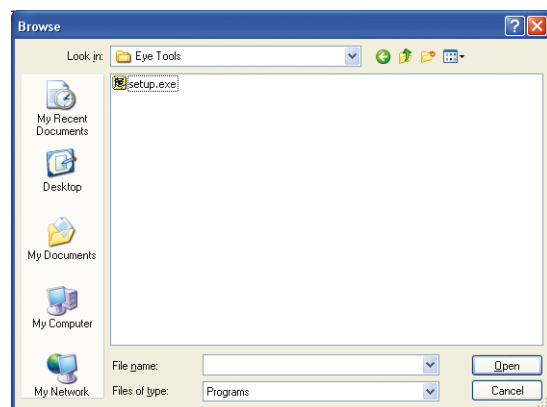

Figure: *Start*, *Run*, then *Browse* to the file required

3. Activation

After installation is complete...

- ◆ Start *eye tools* from the desktop icon.
- ◆ Select *Activation* and enter your *User Name* and *Product Key*.

4. Other Downloads

The *Easy-Read Guide for Eye Tools* is also available for download from the *Eye Tools Support* page of the website www.hanks.optom.com.au.
